

Part I - Philosophy of Knowledge	15
Introduction to Part 1	17
1 <i>Out of the Cave: Rationalism and Empiricism in Antiquity</i>	19
1.1 Introduction	19
1.2 Plato's Rationalism	20
1.3 Aristotle's Empiricism	30
Biographies	38
Summary	40
Next chapter	40
2 <i>Beyond the Pillars of Hercules: A New (Philosophy of) Science</i>	41
2.1 Introduction	41
2.2 The Aristotelian-Medieval Worldview	42
2.3 Bacon's New Methodology	45
2.4 The Scientific Revolution	51
2.5 Taking Stock: The Main Characteristics of the Scientific Revolution	53
Biographies	57
Summary	60
Next chapter	60
3 <i>Behind a Veil of Ideas: Early Modern Rationalism and Empiricism</i>	61
3.1 Introduction	61
3.2 René Descartes	62
3.3 The British Empiricists (Locke, Berkeley, Hume)	68
Biographies	84
Summary	87
Next chapter	87
4 <i>The Limits of Science: Hume and Kant on Human Knowledge</i>	89
4.1 Introduction	89
4.2 David Hume and the Science of Man	90
4.3 Immanuel Kant and the Limits of Knowledge	106
Biography	125
Summary	126
Part II - Philosophy of Science	127
Introduction to Part 11	129
5 <i>Positivism and Hermeneutics: Understanding Humans</i>	131
5.1 Introduction	131
5.2 Positivism	133
5.3 Positivism and the Social Sciences	139
5.4 Social Sciences <i>versus</i> Natural Sciences, Subjects <i>versus</i> Objects	141
5.5 Hermeneutics	143

5.6	<i>Verstehen</i> : A Method for the Social Sciences	145
5.7	<i>Verstehen</i> under Attack	148
	Biographies	152
	Cases: <i>Prices, Schizophrenia, Social Capital</i>	155
	Summary	159
	Next chapter	159
6	<i>Logical Positivism: The Formal, the Factual, and the Fictional</i>	161
6.1	The Vienna Circle	161
6.2	Towards a Critique of Metaphysics	163
6.3	The Formal and the Factual	165
6.3	Verification as Demarcation	168
6.4	A New Job Description for Philosophers	170
6.5	Wittgenstein Revisited	173
6.6	A Phenomenal Basis for Science	176
6.7	Physicalism	178
6.8	A Physicalist Basis for Science	179
6.9	Unified Science	182
6.10	Conclusion	183
	Biographies	185
	Cases: <i>Preferences, Behaviourism, Empirical Sociology</i>	189
	Summary	192
	Next chapter	192
7	<i>Critical Rationalism: Science on Piles above a Swamp</i>	195
7.1	Introduction	195
7.2	Popper and the Wiener Kreis	196
7.3	The Crucial Year, 1919	199
7.4	From Verification, via Confirmation, to Falsification	205
7.5	Falsificationism	209
7.6	Critical Rationalism	216
7.7	The Rationality Principle in the Social Sciences	220
7.8	Criticizing Critical Rationalism	228
7.9	Taking Stock	231
	Biography	232
	Cases: <i>Stagflation, The Unconscious, Suicide</i>	233
	Summary	236
	Next chapter	236
8	<i>Language Games and Paradigms: Thinking front Within</i>	237
8.1	Introduction	237
8.2	Ludwig Wittenstein — <i>Philosophical Investigations</i>	238
8.3	Further Support for Relativism	244
8.4	Thomas Kuhn's View of Science	249
8.5	The Strong Programme	271
8.6	Donald Davidson's Criticism of Kuhn's Notion of Paradigms	274
8.7	'The Road Since Structure': Kuhn's Later Views on Incommensurability	279
	Biographies	286
	Cases: <i>Keynesianism, Introspectionism, Structural-Functionalism</i>	289
	Summary	293
	Next chapter	293

9	<i>Research Programmes and Methodological Anarchy: Competition and Freedom in Gaining Knowledge</i>	295
9.1	Introduction	295
9.2	The Demarcation Problem	296
9.3	Lakatos' Response to Popper and Kuhn	297
9.4	Three Varieties of Falsificationism	298
9.5	Research Programmes	303
9.6	Kuhn's Response to Lakatos	306
9.7	Paul Feyerabend's Methodological Anarchism	308
9.8	An Anarchistic Theory of Knowledge	310
9.9	Methodological Anarchy versus the Scientific Method	312
9.10	The Sokal Hoax	315
	Biographies	318
	Cases: <i>Neoclassical Economics, Representations, Marxism</i>	320
	Summary	324
	Next chapter	324
10	<i>Scientific Realism: To Believe in Science</i>	325
10.1	Introduction	325
10.2	A Brief History of Scientific Realism	326
10.3	Problems of Scientific Realism	331
10.4	The Defence of Scientific Realism	337
10.5	Constructive Empiricism	341
10.6	The Rationality of Scientific Beliefs	347
	Biographies	354
	Cases: <i>Friedman's View, Mental Disorders, Soldiers & Armies</i>	356
	Summary	360
	Part III - New Perspectives / Possible Solutions	361
	Introduction to Part 111	363
11	<i>Pragmatism: Philosophy of Science American Style</i>	367
11.1	Introduction	367
11.2	Confusions about the Unity of Pragmatism	369
11.3	Origin of the Term Pragmatism	371
11.4	Peirce's Fixation of Belief	373
11.5	John Dewey's View of Science	387
11.6	Two Views of Science?	391
11.7	Manifest versus Scientific Image	393
11.8	William James and the Right to Believe	398
11.9	James on Truth and Reality	400
11.10	The Ethics of Belief	403
11.11	Pragmatism and Science	406
11.12	Neo-Pragmatism	410
	Biographies	418
	Summary	421
	Next chapter	421
12	<i>Naturalism: Philosophy on the Edge of Science</i>	423
12.1	Introduction	423
12.2	Quine's Exposure of Two Dogmas in Empiricism	425

12.3	Quine's New Empiricist Perspective	434
12.4	Quine's 'Epistemology Naturalized'	437
	<i>Intermezzo: Darwin's Theory of Evolution</i>	443
12.5	Darwinian Epistemology and Naturalized Philosophy of Science	460
12.6	Philosophy of Science Radically Naturalized	464
12.7	Conclusion	466
	Biographies	468
	Summary	470
	Next chapter	470
13	<i>Prospects for the Social Sciences: Unification and Pluralism</i>	471
13.1	Standards for Science: Empirical Facts and Beyond	471
13.2	Unification and Reduction	473
13.3	Away from the Blackboard: The Case of the Homo Economicus	478
13.4	Lifting Trade Barriers: Integrating the Social Sciences	500
	Summary	507
	Further Reading	508
	References	511
	Subject Index	522
	Name Index	525
	Illustration Credits	527
	About the Authors	528
